

2019 Formulary List

Your prescription drug benefit is an "open formulary," meaning all FDA approved, prescription drugs are covered, even if not listed on the formulary. Any drugs not listed on the formulary will be covered and medically necessity may be required for Specialty Medications. If your medication is not listed on this formulary please contact CVS Caremark at 1.866.475.7589 to determine if prior authorization is required. Some drugs may be excluded under limited circumstances, such as those that require administration by a healthcare professional.

Please note: If the medication you are taking is not listed in this guide, please consult your plan or call the toll-free number on your pharmacy ID Card. Also, please consult your plan to check coverage and copay information for a specific drug. The tier assignment for a drug not listed on this guide will be based on the type of drug (generic, preferred or non-preferred brand, specialty), as described below under "Tier Information."

Some drugs may require Prior Authorization (PA). There are notations included in the list indicating whether Prior Authorization is required or not required, and indicated by Yes and No next to the drug.

If your doctor believes you have a specific clinical need for one of these products or is seeking a prior authorization for medical necessity, he or she should contact the CVS Caremark Prior Authorization department at: **1.855.240.0536**

Prior Authorization Process:

Injectable and Specialty Medications

To obtain Injectable and Specialty Medications, your physician should contact CVS Caremark Specialty Prior Authorization department to submit a prior authorization at 1.866.814.5506. Information about the pharmacy provider designated as the specialty pharmacy provider will be provided during the prior authorization process.

Prescription Drug Prior Authorization Request

You or your doctor can submit a request for drugs that require prior authorization. This is called a request for prior authorization. Once the prior authorization is approved, we treat the drug(s) as an essential health benefit.

Non-Urgent Prior Authorization Request

Your doctor can call the customer service number on the back of the member's ID Card. Your doctor should make this prior authorization request before writing the prescription.

We will make a determination on the non-urgent prior authorization request and notify you or the prescribing doctor of its coverage determination no later than 72 hours following receipt of the request.

When we approve a non-urgent prior authorization request, we will provide coverage of the drug for the duration of the prescription, including refills.

Urgent Prior Authorization Request

You or your doctor can request an expedited review based on urgent circumstances. Urgent circumstances are when you are suffering from a health condition that may seriously jeopardize your life, health, or ability to regain maximum function or when you are undergoing a current course of treatment using a drug.

We must make the coverage determination on an expedited review request based on urgent circumstances and notify you and the prescribing doctor of its coverage determination no later than 24 hours following receipt of the request.

When we grant an authorization based on urgent circumstances, we will provide coverage of the drug for the duration of the request.

External Prescription Request Review

If we deny a request for a non-urgent prior authorization or for an urgent prior authorization, you or the prescribing doctor can request that the original authorization request and denial be reviewed by an independent review organization.

The independent review organization must make its determination on the external exception request and notify you and the prescribing doctor of its coverage determination no later than 72 hours following its receipt of a non-urgent prior authorization request, and no later than 24 hours following its receipt of an urgent prior authorization request. If the independent review organization grants an external exception review of a non-urgent prior authorization request, we will provide coverage of the drug for the duration of the prescription. If the independent review organization grants an external exception review of an urgent prior authorization request, we must provide coverage of the drug for the duration of the requirement.

If we do not respond on an authorization request within 72 hours for a non-urgent prior authorization request or 24 hours for an urgent prior authorization request, we are required by law to authorize the drug.

PREVENTIVE CARE SERVICES

Preventive care drugs listed on tier 5 "Zero Cost Share Preventive Drugs" are covered without cost only if an individual qualifies, such as satisfying age or other required characteristics. If you do not qualify for the preventive benefit then a cost share and/or deductible will apply as indicated by the tier designation in the formulary. For additional information click on the attached link:

<https://content.meritain.com/DownloadFile.aspx?docid=34AC22F1-7B3D-40EB-95A4-63B8600A8F24>

- Evidenced-based items or services that have in effect a rating of "A" or "B" in the current recommendations of the United States Preventive Services Task Force. The current recommendations of the United States Preventive Service Task Force regarding breast cancer screening, mammography, and prevention will be considered the most current other than those issued in or around November 2009. The American Academy of Pediatrics Bright Futures Recommendations for Pediatric Preventive Health Care, and The Uniform Screening Panel recommended by the U.S. Department of Health and Human Services Secretary's Discretionary Advisory Committee on Heritable Disorders in Newborns and Children.
- Immunizations that have in effect a recommendation from the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention with respect to the Insured Person involved.
- Immunizations for children in accordance with the recommendations of the American Academy of Pediatrics and immunizations for adults as recommended by the U.S. Public Health Service.
- With respect to Insured Persons who are women, such additional preventive care and screenings not described in paragraph (A) above, as provided for in comprehensive guidelines supported by the Health Resources and Services Administration including:

All Food and Drug Administration approved contraceptive methods, sterilization procedures, and patient education and contraceptive counseling for all female insured members with reproductive capacity and follow-up services including but not limited to management of side effects of contraceptives, counseling for continued adherence, and device insertion and removal.

Benefits are payable for all FDA-approved contraceptive drugs, devices, and other products for women, including all FDA-approved contraceptive drugs, devices, and products available over the counter, as prescribed by the insured's provider. If the FDA has approved one or more generic therapeutic equivalents of a contraceptive drug, device, or product, then only generic contraceptive drugs, devices, and other products are covered under the preventive care benefit without cost sharing and brand preferred and brand non-preferred contraceptive drugs, devices, and other products are covered under the prescription drugs and medicines benefit and are subject to cost-sharing. With respect to a female plan member for whom a generic contraceptive Drug or device may be inappropriate, as determined by your physician, we will waive the otherwise applicable cost for the brand preferred or brand non-preferred contraceptive Drug or device. Generic drugs, brand preferred drugs and brand non-preferred drugs are defined in the prescription drugs and medicines benefit. Benefits include over-the-counter FDA approved contraceptive methods for women as prescribed by a healthcare provider, and procedures to implant and remove internally implanted time-release contraceptives (implants) and intrauterine devices (IUDs)

Tier Information

Tier 1 - Generic Drugs
Tier 2 - Brand Preferred Drugs
Tier 3 - Brand Non-Preferred Drugs
Tier 4 - Injectables and Specialty Drugs
Tier 5 – Zero Cost Share Preventive Drugs
